VI. Conclusion

This workshop has given full play of high level East Asian universities’ innovation abilities, innovative ideas and explored innovative development paths of science and technology parks. And also it has promoted cooperation and idea exchanges between East Asian universities. During this workshop, NJU as the organizer has called for the establishment of AEARU Committee of Science and Technology Parks, which got great support from other participating universities.

VII. AEARU Funding

The 4th S&T Parks Workshop was granted AEARU funding of USD 10,000 at the 32nd BOD meeting, and then the Workshop was postponed to fall 2014. The funding was not transferred. Actually, we only received 2 student participants from AEARU member universities, so Nanjing University covered their local expenses and gave up the AEARU sponsorship.
