

Summary Report

The Fourth AEARU Workshop on Network Education

Date: November 16-17, 2006

Host: National Taiwan University

Venue: All workshop sessions were held at the Auditorium of the Library at National Taiwan University.

Number of Participants: 82

25 scholars of AEARU member universities from Japan, Korea, Hong Kong, and China were invited to attend this workshop.

Programs:

We have invited Dr. Chao-Han Liu, the Vice President of Academia Sinica and Dr. Ovid J. L. Tzeng, the Academician of Academia Sinica to deliver the following keynote speeches:

1. "Science and Technology for Learning-Some Recent Results from National Program for e-Learning"
Speaker: Dr. Chao-Han Liu, the Vice President of Academia Sinica
2. "NDAP: A Successful Website Story in Taiwan"
Speaker: Dr. Ovid J. L. Tzeng, the Academician of Academia Sinica

In addition to regular sessions (24 speeches), we also offered poster sessions (8 presentations) during the workshop.

Comments by the Organizing Committee

The themes of this workshop are "digital archives and e-learning". In this workshop, twenty-four full papers and eight posters were selected from about sixty submissions. Among these full papers, fifteen of them were from AEARU member universities.

The workshop provided a good opportunity for scholars and professionals from different universities and countries to share their knowledge and experience. Many new ideas had been generated from the enthusiastic discussions of presenters and participants, especially the interaction strategy in network education, distance learning, curriculum and content development, course blog and learning environment construction. We also witnessed various impressive implementations of instructional design and technology from the AEARU members.
